sensation

Sunday Times  
secures the full  
exclusive story

BEGINNING NEXT WEEK

The Sunday Times has secured the first full and first-hand story of one of the most sensational espionage affairs since the war.

Its cast includes the late President Kennedy, General de Gaulle and a Russian defector who enabled Western intelligence services to neutralise 200 K G B agents. The story—which will begin exclusively in the Sunday Times next week—contains astonishing allegations by a former senior member of the French Secret Services now living in the United States. Insight has checked the details of the affair in Washington, New York and five European capitals. One of the explosive charges is that high up within French Government circles there has been a traitor, a French Philby, who pushed President de Gaulle into anti-Western acts. The repercussions of the case shed new light upon the secret causes contributing to the precipitous decline in French-American relations over the last five years.

## EXCLUSIVE NEXT WEEK

For four years the affair has been a secret closely guarded by the intelligence services of the West, though recently rumour and speculation has followed in the wake of inquiries by the Sunday Times and Life magazine and hints of the affair in Topaz, the recent best selling novel by Leon Uris.
